EPOXY HIGH SOLIDS COATING FOR ANTI-CORROSION

PRODUCT NUMBER EP-988

TYPE The high solids coating based on epoxy resin with anti-corrosive pigment and mica powder.

USES Used for ship, bridges, tanks, pipelines, petrochemical plants and steel structures.

CHARACTERISTICS 1. Tough and hard film, excellent abrasion resistance.

2. Excellent anti-corrosion and water resistance.

3. Use green anticorrosion pigment in formula, both excellent inhibitory and hiding performance of corrosive protection for steel.

4. Excellent resistance to oils and chemicals.

5. Can be applied to variety types of coating, or be coated a variety types of coating, for the best maintenance coating.

6. When use high weather resistant paint, the anti-corrosion performance is especially excellent.

7. After surface treated, carbon steel, stainless steel and hot-dip galvanized substrates can all be attached.

COLOR Brown, Gray FLASH POINT Above 25°C

SPECIFIC GRAVITY Above 1.5 Kg/L (mixture) VISCOSITY About 95 KU (mixture)

4 hrs. Dry hard Fully cured 7days (25°C) **DRYING TIME** Set-to-touch 12 hrs.

108~652 microns Dry 100~600 microns **OPTIMUM FILM THICKNESS** Wet

VOLUME SOLIDS 90±3%

THEORETICAL COVERAGE 35.2 m³/Gal $9.3 \, \text{m}^3/\text{L}$ 5.96 m²/Kg (DFT:100 um) **OVERCOATING INTERVALS** Min. 10 hrs. Max. 7 days(top coat) 28 days(EP-988)

THINNER Xylene or SP-12 Epoxy thinner (0~5%)

Epoxy · Polyurethane · Fluorocarbon resin system SUBSEQUENT COATS

MIXING RATIO Base: hardener = 77.6: 22.4 (by weight)

POT LIFE 2 hrs. (mixture, 25° C)

Minimum 2 years under normal storage conditions. STORAGE SHELF LIFE

APPLICATION METHOD Airless Spray, Brush, Roller

Air pressure 4 Kg/cm² Pump ratio 45:1 or greater FOR AIRLESS SPARY Tip size 0.017"

1. Mix base and hardener according to the mixing ratio and stir thoroughly.

- 2. Moisture, grease, sludge, dust, corrosive salt must be thoroughly cleaned from substrate.
- 3. Avoid applying the paint in raining weather or the relative humidity exceed 85%RH, particularly, a wet surface must be thoroughly dried.
- 4. All equipments must be cleaned immediately after use.
- 5. The coating should be stored in cool ventilated place, do not exposed to the sun in outdoor to avoid affecting the quality.
- 6. To increase or decrease the usage of thinner depending on the temperature of the coated surface, the temperature decreased may have to add more amount of thinner.

EPDM10EP988X V1.6
